

SUNIL KUMAR

AI / ML Engineer

Mohali, Punjab, India | sunil.belipar@gmail.com | [LinkedIn](#) | [GitHub](#) | Open to Relocation: Dubai, UAE

PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer with hands-on experience designing and deploying intelligent systems using Python, Large Language Models (LLMs), and modern AI frameworks. Proven expertise in building AI assistants, computer vision applications, and intelligent automation solutions. Proficient in AI agents, RAG architectures, and real-time AI systems. Passionate about delivering scalable, production-ready AI products that solve complex business challenges — with a strong interest in contributing to the UAE's rapidly growing AI ecosystem.

TECHNICAL SKILLS

Programming	Python
AI / ML	Machine Learning • Deep Learning • NLP • LLMs • Computer Vision
Frameworks	LangChain • HuggingFace • OpenAI API • Gemini API • PyTorch • TensorFlow • LLMs • RAG
AI Tech	RAG (Retrieval Augmented Generation) • AI Agents • Prompt Engineering • Vector Databases
CV	YOLO • Object Detection
Databases	MongoDB • MySQL
Tools	Git • GitHub • VS Code • PyCharm • REST APIs

PROFESSIONAL EXPERIENCE

AI/ML Developer — Mohali, India

2025 – Present

- Design and develop AI-powered automation systems leveraging Python and state-of-the-art LLM technologies.
- Build enterprise-grade AI assistants capable of real-time conversational interaction and dynamic knowledge retrieval.
- Architect and implement RAG-based AI systems using vector databases for contextually accurate document intelligence.
- Develop AI voice assistant and chatbot systems for seamless, natural user interactions.
- Integrate AI models with RESTful APIs and backend infrastructure to deliver end-to-end production solutions.

KEY PROJECTS

Enterprise RAG AI Assistant Platform

Designed and built an intelligent AI assistant that leverages Retrieval Augmented Generation to deliver context-aware enterprise knowledge management. The system processes large document corpora, constructs vector embeddings, and delivers precise, grounded answers via LLMs.

Technologies: Python • LangChain • Gemini API • Vector Databases

AI Voice Assistant System

Engineered a real-time voice assistant capable of speech understanding, intelligent response generation, and natural user interaction powered by leading LLM APIs and speech processing pipelines.

Technologies: Python • LLM APIs • Speech Processing

Basketball Object Detection System (YOLO)

Developed a high-accuracy computer vision model for real-time basketball detection and tracking using YOLO object detection, demonstrating applied expertise in visual AI and model fine-tuning.

Technologies: Python • YOLO • Computer Vision

EDUCATION

Master of Technology — Computer Science & Engineering

*Punjab Technical University,
Jalandhar | CGPA: 8.25*

ADDITIONAL SKILLS & LANGUAGES

Skills	AI System Design • Data Processing Pipelines • Model Integration • API Development • AI Workflow Automation
Languages	English • Hindi
